

**FOURPOINT**  
Industrial Services Ltd.

We are a Western Canadian-based Industrial Services company with our Head Office located in Edmonton, Alberta. Our expertise in Bridge Construction, Industrial Piling (Driven/Helical/Vibratory), civil work, and site remediation, allow us to deliver exacting craftsmanship and service to our clients in a safe and economic manner.

## FOUR POINTS THAT MEAN A LOT TO US

**CLARITY** We understand that to grow our corporation, we must listen carefully to the needs of our Clients. Being clear and confirming what is expected provides us the direction to perform well and deliver.

**CONFIDENCE** Utilizing the skills, focus and certifications of our team ensures that we provide quality products and service in an ever more demanding industrial market.

**CREDIBILITY** The Fourpoint team, our brand, our products and service are what we stand behind, every day, proudly. Our reputation matters and we have earned it.

**CONSISTENCY** We arrive at the finish line for each project by being accountable for safe, quality deliverables and goals. We measure our effectiveness and strive to make improvements on a continual basis. We treat our obligations to our team, clients and the community seriously, with respect.

# SAFETY

At Fourpoint Industrial Services Ltd., we are proud to have active and supportive participation by all our team when it comes to operating safely.

Our goal is simple: everyone home safe, always.

From the first moments with our company at orientation, through to the daily assessments of jobsite and task risk assessments, safety meetings, site inspections and wearing the appropriate PPE, we strive to maintain and continually improve our safety process.

We embrace and are committed to following all operating codes, regulations and standards as they apply to our industry. In strong support of our Safety program, we encourage innovation when it comes to reducing negative exposure to unsafe conditions or harmful environments for our team, our clients and the communities in which we operate.

Our ongoing goal is Zero Harm to people and the environment as we continue to provide a safe, healthy, productive and viable place of employment for our team and a reliable source of support for our clients.

# BRIDGE & CULVERT CONSTRUCTION

Fourpoint Industrial Services Ltd. has over 15 years of experience in managing and constructing bridges and culverts in the industrial sectors across western Canada. From temporary 20ft single lane bridges to permanent double wide concrete structures, small corrugated diameter culverts to large multiplate pipes, we have the experience and know how to complete these projects on time and on budget.

Fourpoint has the key personnel and equipment to complete any size bridge project with excavators, bridge launch nose and skids, as well as all the necessary peripheral equipment such as light plants, packers, loaders, and fully stocked toolcans.

As Fourpoint's focus includes industrial projects in semi-remote to remote locations across Western Canada, we certainly recognize the need to be well prepared before arriving on site. This includes bringing all the equipment and supplies necessary to get the job done in a safe, timely and cost-effective matter. For this reason, our execution plan typically includes mobilization of a tool crib which comes complete with hose presses, spare fittings, various size hydraulic hoses, spare tires, generators, miscellaneous tools, and 10ft of deck for any miscellaneous materials needed for the job. Having this on site minimizes downtime and allows us to enable our goal of showing up on site ready to work!

To date we have received very positive client feedback and have a strong safety record which allows us to enjoy less than industry average ratings from WCB where we are partners in industry.

## SERVICES WE OFFER INCLUDE:

- ◇ Temporary Installations
- ◇ Permanent Installations
- ◇ Pile Capping & Field Welding
- ◇ Concrete Foundations
- ◇ Maintenance and Repairs

Fourpoint is your go-to partner for access solutions, from temporary to permanent installations from puddles to roaring rivers Fourpoint has a solution that is right for your project. We are experienced in the safe erection of allsteel, Bailey, and concrete deck, to name a few.

## CIVIL WORK

Fourpoint Industrial Services Inc. can support many projects by also specializing in site preparation, bulk and detail excavations and a wide array of activities for commercial and industrial projects. With our long history of industrial civil earthwork and support services our team understands the urgency and necessity of timely response.

Projects are often an orchestra of many contractors with a common goal to achieve project success. We have the experience to work on multi-contractor and multi-trade sites and to effectively coordinate our efforts to meet our client's expectations.
